YES! I want to make a difference

Help fund scholarships for music lessons, camp or post-secondary programs

Help members of the medical community learn more about WS and the special treatments often required by those with Williams syndrome

Help those with WS secure life-saving procedures provided by experts

Help researchers find answers for those with WS that could assist millions of Americans with high blood pressure, anxiety disorders and diabetes

Help individuals with Williams syndrome realize their full potential

Thank you!

About Williams syndrome

Williams syndrome (WS) is a rare genetic condition that is present at birth and can affect anyone. It presents lifelong medical, cognitive and behavioral challenges. But there is a bright side. Medical and learning challenges often occur side by side with striking verbal abilities, highly social personalities and an affinity for music.

Williams Syndrome Awareness

Most people do not know that Williams syndrome occurs randomly and can affect anyone. They don’t understand the unique challenges faced by individuals nor have they experienced their joyful outlooks on life or been given the chance to impact the lives of families affected by Williams syndrome.

Awareness Month activities will help put Williams syndrome “on the map.” With your help we can educate teachers, inform doctors and share family journeys. Increased awareness will provide a greater opportunity to raise critical funding for research and new programs, and build a greater appreciation and understanding of people with Williams syndrome.
